Carnegie Mellon University '17, Pittsburgh, PA
B.S Information Systems (IS) & B.S Human Computer Interaction (HCI)

Experience

NOHO Labs / Eterna Technologies
Founding Design Engineer
SEP 2025 - PRESENT

Designed, implemented, and scaled two branded healthcare platforms supporting mass-market asynchronous care (Aluna Science, <2 months) and concierge care (NOHO, <6 months) as employee #3.

Architected the frontend for NOHO's \$3M+ ARR platform, featuring dynamic care plans, after-visit summaries, clinical intake, and a theme-able design system + Storybook.

Handshake
Senior Product Designer, DS
AUG 2024 - SEP 2025

Core contributor to the Rosetta Design System, building foundational components, inputs, cards, accessible UI patterns, and shared primitives used across the platform.

Refactored the design token architecture (102 → 27, 74% reduction), migrated and deprecated 5+ legacy components, and responsible for quarterly roadshow and contribution guidelines

Everlaw
Senior Product Designer, DS Lead
JAN 2023 - AUG 2024

Lead the Bluebook design system effort. Key contributions include: Table filtering & pagination, Listboxes, Tags/Counter Tags, tokens, championing accessibility, and more.

Improved design <> engineering collaboration by migrating to Storybook (SB7) and standardizing workflows, reducing component delivery from 4-6 quarters to 1-2 quarters

Carta
Design Technologist
OCT 2021 - SEP 2022

Spearheaded and led a cross functional group to maintain the "Ink on Figma" library and rolled out rebrand. Built multiple components and prototypes per quarter.

Improved org's UI health by 50% by addressing poor FE hygiene. Championed Storybook adoption to help teams maintain domain specific patterns built with Ink.

Blend
Design Technologist
FEB 2019 - OCT 2021

Founding member of the Alchemy Design System, establishing a unified foundation that supported Blend's growth from 400 to 1,000+ employees.

Created prototypes of Blend's One Tap Mobile flagship product for usability tests, sales demos, and exploratory experiences using FramerX and React.

Intuit
Software Engineer
AUG 2017 - JAN 2019

Built React + Redux experiences for QuickBooks Payments Onboarding, shipping DocUpload, onboarding redesign, and early contributor of Intuit Design System components for millions of QuickBooks customers.

Contract / Side projects

Design Systems Contracting
OCT 2022 → PRESENT

Audit, consolidate, and establish a design system for seed / early stage startups including Vesta, Nsave, and Roster Dating.

Drip.ai
JAN 2025 - MAR 2025

Shipped entire frontend MVP within 2 months to secure seed funding for stealth startup; MVP included infinite scroll, routing, BE integration, and pixel perfect components

Skills & Hobbies

Skills

0 → 1 designs via React + Typescript, Storybook, Figma, agent skills/shared context orchestration

Accolades

a16z Inaugural Design Engineer Fellow → Summer 2026
Everlaw Product Org-wide spot award → Q1 2024
Blend Hacks VIII → 2020, Intuit Intern Hackathon → 2016
